- What hypothesis explains the origin of eukaryotic cells?

### Formation of Earth (pages 423–424)

1. List six components of Earth's early atmosphere.

2. Is the following sentence true or false? Liquid water first occurred on Earth more than 4 billion years ago. \_\_\_\_\_

### The First Organic Molecules (page 424)

3. Label the diagram to show which part of Miller and Urey's apparatus simulated lightning storms on early Earth.

4. Circle the letter of each sentence that is true about Miller and Urey's experiments.

#### **Reading Skill Practice**

When you read a section that contains new or difficult material, identifying the sentence that best expresses the main topic under each heading can help you focus on the most important points. For each heading in Section 17–2, identify and copy the sentence that best expresses the main topic under that heading. Do your work on a separate sheet of paper.
